Comments (any action/recommendation with an asterisk must be accompanied by an explanation here):
This activity presents a minimal risk and constitutes a public health investigation designed to identify potential health risks and interventions.

Signature (Acting Chair):

Harry McGee

Approval Date*:

11/18/03

*All approvals are for one year from this approval date unless otherwise indicated. Prior to the end of one year from the date of this approval the project must be resubmitted for approval in order for human subjects research to continue.

The MDCH IRB must approve any changes to this study protocol before they are implemented.

Any unexpected problems or changes in the research environment that could potentially be a human subjects concern must be reported immediately to the MDCH IRB Chair.
